Hourlies 2024

my hands hurt so much tonight.

Last night was a painful night too...

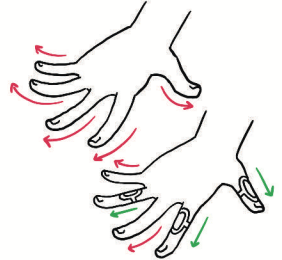

I decide to try one of my prescription meds I've barely touched.

Pain meds don't work well on me. I have to take the max dose and it still probably won't work. Opiates don't work at all.

But I try.

My finger braces keep my fingers from hyperextending. ♡ I love them ♡

Almost rage cry at my extra painful hands.

OPTIMISTIC

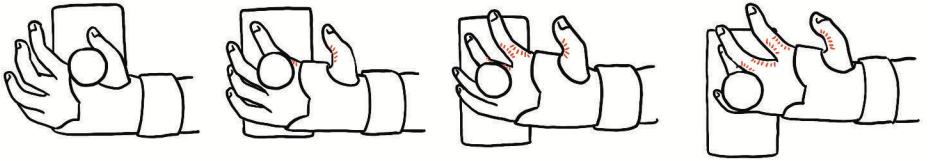

Tie a robe belt around my hips. I hope it will keep them from rolling in my sleep.

art challenge.

I move my pop socket
every few minutes, when my
fingers start hurting.

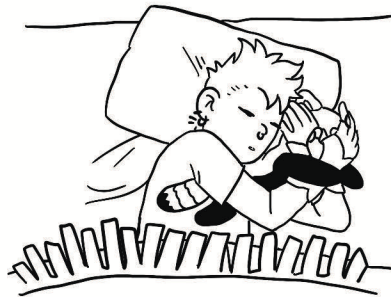

Soon I have to prop
it on my hand to use my
phone at all.

The pain
meds did not
work.
